CU Function Finder

Sawyer Basch
Dawson Ash
Ryan Renemans
Abrham Gebremeskel
Ayub Ahmed

Overview

- The CU Function Finder (CUFF) is a site designed to allows students to easily connect with other students for planning and attending events of different natures. Its goal is to allows people to advertise events that they are planning. In addition it helps students determine if events are worth going to through our rating system.
- The target audience is students who either want to attend events or students who are hosting events

Group Meetings

- We never had any issues with meeting.
- Our meetings were at Mondays 4-5 in the CSCL
- We also meet at 4:45 to 6:00 every wednesday in recitation

Methodologies

01 We mainly used the agile methodology. 7/10

02 We also used an iterative and incremental approach. Where we first created the base structure then reviewed that and improved on its flaws and added more complex features. 10/10

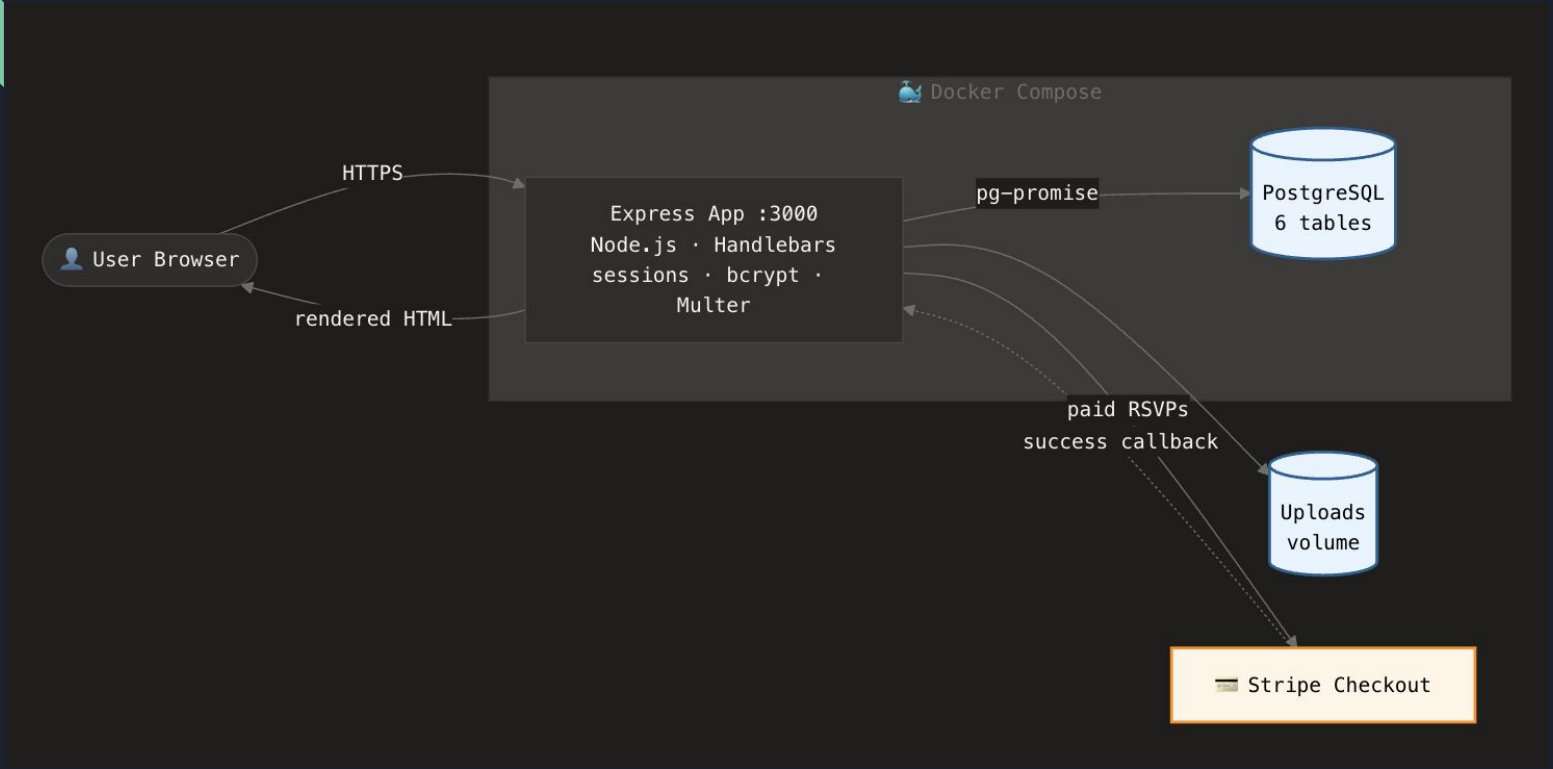
Architecture Diagram



Challenges

- Bug fixing/general testing of our features-
- Docker environment inconsistencies-
- Version control-

Future Scope

- Peer-to-Peer messaging
- Event message boards
- Friends
- Email Verification
- Improved Search Function
